Frontend Engineer with 5 years experience building scalable, performant and beautiful production level web applications in React and TypeScript. Experienced across the full development lifecycle, including feature development, frontend architecture, state management, testing, CI/CD, deployment and monitoring. AWS certified, with a design background that sharpens product and UX judgment.

WORK EXPERIENCE

sonnen GmbH - Berlin — December 2022 - January 2026

Frontend Software Engineer

sonnen is an energy company specialized in battery production and energy contracts. As part of a two-person frontend team, I was maintaining and building the following projects:

Toolbox - modern dashboard for sonnen partners – 80% test coverage
- B2B microfrontends application built with React, Vite Module Federation plugin and GraphQL, hosted in a monorepo on GitHub and deployed to an S3 bucket served through AWS CloudFront
- I was involved in all project phases: from microfrontend architecture research, building the PoC and writing ARDs, to setting up the CI/CD pipeline with GitHub Actions, S3 buckets, then building features and releasing the MVP

Tariffs - new user flow to purchase energy contracts – 80% test coverage **Link**
- B2C public application built with React, Vite, GraphQL, and ContextAPI
- I was responsible for setting up the CI/CD workflow implementation, requesting the custom domain and SSL certificates, and localisation with i18n and POEditor
- in addition to ongoing feature development, I ensured 80% test coverage, monitored with Sentry, and mentored junior team members

Partner Portal – legacy application for sonnen partners – low test coverage
tech stack: React, Redux, RxJS, SASS, webpack, REST API, hosted on GitLab
- legacy app where I maintained the codebase and occasionally developed new features

web-ui – design system component library – 90% test coverage
- I led tech stack research and selection, onboarded the design team on atomic design methodology, and helped build the library from scratch

Responsibilities common to all projects:
- thorough code reviews focused on enhancing best practices, functionality, readability, and maintainability, as well as knowledge transfer
- my communication and organisational skills enabled me to occasionally fill gaps caused by a fast-moving environment, such as clarifying business requirements, writing tickets, leading Refinements, while my keen eye for design details made me a go-to person for designers and QA when testing user flows and UI.

futurice GmbH - Berlin — August 2021 - November 2022

Software Engineer Consultant

Futurice is a consultancy with Finnish roots and values that develops IT solutions for clients on the German and Scandinavian markets. I worked on the following projects:

RedBull München website **Link**
- Building features for a server-side rendered frontend application with Remix and styled-components

Technologies and tools

in-depth:
TypeScript
React
ContextAPI
GitHub Actions
React Testing Library
JavaScript (ES6+)
Vite
Storybook
Jira
POEditor
i18n

familiar:
GitLab
Sentry
Redux
Node.js
Sass

used in past projects:
AWS Serverless
MongoDB
PostgreSQL
Google Firebase
React Native
Postman
Swagger
Figma
InDesign
Photoshop
Illustrator
Material-UI
jQuery

Mobile application for FC Byern and RedBull München

- main role: developing frontend features with React Native and TypeScript, closely collaborating with the UI/ UX designer team
- occasionally working with Contentful, Cloudinary, Node.js, GraphQL, aws (lambda and DynamoDB)

aaron.ai - Berlin — February 2021 - July 2021

Junior Fullstack Javascript Developer

At Aaron.ai, I joined an agile team and from the very beginning took ownership of a complex feature from concept to implementation. In the absence of dedicated design team, I had the opportunity to leverage my UI/UX skills and work on the design as well as on the frontend implementation. As feature owner, I coordinated with internal stakeholders to align business needs and technical constraints.

dan pearlman - Berlin — 2017 - 2019

Freelance Graphic & Retail Interior Designer

I assisted their in-house teams in different phases of numerous projects, from 3D modelling, post-production in Photoshop and client presentations to CAD blueprints

Weiss - Heiten - Berlin — 2016 - 2019

Freelance Graphic & Retail Interior Designer

During my collaborations with Weiss Heiten, I was responsible for 3D renderings, floor drawings, and detailed furniture plans for high-end projects.

PIANO:TERRA - Bucharest — 2009 - 2015

Interior Designer

At PIANO:TERRA I was involved in all aspects of interior design projects, from the conceptual phase to supervising construction sites and project coordination

Soft skills

empathic communicator

cross-functional collaborator

detail-focused

solution-oriented

autonomous

out-of-the-box thinker

EDUCATION

aws — 2022

AWS Certified Cloud Practitioner

Spiced academy - Berlin — 2020

Full Stack Web development Bootcamp

A 12-week intensive fullstack web development course focused on the latest web technologies and building real-world projects.

Technische Universität – Berlin — 2018 - 2020

Computer Science — two semesters

During the two semesters at TU, I acquired foundational computer science knowledge: Mathematics (Calculus I, Linear Algebra), Machine and Formal Language Theory, low-level programming with C, and Data Structures and Algorithms in Java.

National University of Arts – Bucharest

BA Faculty of Decorative Arts & Design Interior Design — 2007 - 2010

LANGUAGES

English
fluent
2012 - IELTS Academic
2004 - English Translator Diploma
2003 - Cambridge Certificate

German
fluent
2017 - Test DaF C1

French
conversational

Romanian as mother tongue.

PERSONAL PROJECT

Old project to showcase my skills and built with the popular tech stack at that time. Check out the link to see more (SSL not renewed). **Link**
